

## Services Splash Page

All images should be roll-over or press to colour

### 1280

1. Missing Phone Contact

### 1080

1. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.
2. Missing Phone Contact

### 1024

1. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.
2. Image seems to have a pale blue line at its base
3. The services images and text seem to be less than margin 3 (arrows). Please adjust.
4. The arrows that define margin 3 are slightly too close to the team images which are margin 2. So the arrows should always be half way from margin 2 to the window edge.

### 960

1. The header image should NOT fill the window. See previous instructions
2. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.
3. Last image should be flush left
4. All images should be colour when you press them or roll over with mouse
5. The core health team image proportions have changed. This should NOT be the case. They should remain in the correct x by Y

### 834

1. The header image should NOT fill the window. See previous instructions
2. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.
3. Last image should be flush left
4. All images should be colour when you press them or roll over
5. The services images and text seem to be less than margin 3 (arrows). Please adjust.
6. The arrows that define margin 3 are slightly too close to the team images which are margin 2. So the arrows should always be half way from margin 2 to the window edge.

### 768

1. The header image should NOT fill the window. See previous instructions
2. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.

3. Logos should be smaller
4. All images should be colour when you press them
5. The services images and text seem to be less than margin 3 (arrows). Please adjust.
6. The arrows that define margin 3 are slightly too close to the team images which are margin 2. So the arrows should always be half way from margin 2 to the window edge.

#### **480**

1. The top image has a strange blue tint that extends down past the image
2. The Primary headline seems odd - it has a greater line spacing than the others... Consistency please.
3. The 4 logos are enormous. Please size logically
4. All images should be colour when you press them
5. The side arrows have suddenly got very small. When the page goes from 1440 down to 480 responsively, the arrows should reduce in size more logically.
6. Close up space - beRehab image | s|age | beRehab text | **space (same as top one)** | next
7. WhatsApp Chat should be 20% bigger here

#### **Mobile Menu**

1. Make + sign same weight as lettering
2. When open the individual services need to be more spaced out so clicking with a finger is slightly easier.

#### **Other pages**

1. Please go right through them to create consistency in the top heading; the carousel proportions (below 1000 pixels - ie on 960) the logo sizes, the headings, the spacing between paragraphs and assets, Sizing of assets - per comments above... etc.

I see quite a few inconsistencies that are mostly covered by my comments above. So if you fix all pages in line with these comments, the whole site should be much nearer to consistent.

Many thanks  
Nicholas
